Allowed Claims: 8-18, 20-29, 31-33

Response to Arguments

Applicant's arguments see Remarks, filed March 27, 2006, with respect to independent claim 27, as amended, have been fully considered and are persuasive. The Examiner's basis for allowability of independent claim 27 is the same as those set forth within that Response. The rejection of claims 27-29 and 31 has been withdrawn.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: none of the prior art alone or in combination disclose or teach of the claimed combination of limitations to warrant a rejection under 35 USC 102 or 103.

Regarding independent claim 8, none of the prior art alone or in combination disclose or teach of a MEMS device as disclosed including a rotatable mass held above a substrate by upright springs at a first offset distance, specifically the device includes the rotatable mass being part of a motion actuator that in combination with the upright spring enables rotation of the rotatable mass about a rotation axis offset from the substrate by a distance greater than the first offset distance.

Regarding independent claim 32, none of the prior art alone or in combination disclose or teach of a MEMS device as disclosed including a rotatable mass held above a substrate by upright springs, specifically wherein the rotatable mass comprises an outer sub-structure adapted to move with respect to the substrate and an inner substructure adapted to move with respect to the outer sub-structure.
